

## DriSilane the Best Medicine

During the trying times of the Covid pandemic for the UK, it remained vital the important NHS supply chain continued unbroken and here again DriSilane met the challenge.

During the refurbishment of a 145,000 sq ft roof of NHS Supply Chain distribution facility in Normanton, it was established that the sheets were suffering the effects of cut edge corrosion and the original coating had reached its repaint decision time.

Since internal disruption was out of the question, DriSilane® Programme experts NSS Maintenance Ltd diagnosed the ReCote specification as the most effective solution.

Using the DriSilane® range of moisture tolerant products, the usual side effects of weather delays and prolonged scaffolding normally associated with work on such a large project were avoided.

Work to the roof was completed without disruption to key workers and deliveries, within budget and on schedule.

Roof: **DriSilane® ReCote**

Sheet cut edge corrosion treatment, plus overall one coat, 300 micron applied DriSilane® Elite, advanced Hybrid polymer roof coating.

Roof Project:	Area	Specification
Aged Coating Replacement plus Cut Edge Corrosion treatment	14,500 m <sup>2</sup>	DriSilane® ReCote

Installation: NSS Maintenance Ltd      Tel: 03459 677477

## DriSilane® Roofing Programme

The best specification, product and applicator combination for the refurbishment of profiled steel sheets, seals and gutters.

DriSilane specifications use advanced coating technology that combine the elasticity of silicone and toughness of polyurethane for durable flexibility, adhesion and strength .

Moisture tolerant and manufactured in the UK, DriSilane coatings are installed only by experienced professionals, industry recognised for their skill and expertise.

DriSilane® ReCote carries a 20 year warranty.
