

## REALTERM WAREHOUSE

LONG EATON NOTTINGHAM  
286,200 sq ft.

## Elite Care & Security

Modern logistics and warehousing needs building stock that's in tip top condition. The steel roofs often need specialist care and attention to provide continued protection for the valuable merchandise that's securely housed within.

That's why the refurbishment of a 286,000 sq ft logistics facility in Long Eaton Notts. was entrusted to the care that could be provided by DriSilane® once it was recognised that the factory installed plastisol protective coating to the roof sheets had reached its end of life.

The DriSilane® ReCote specification is designed to fully reinstate profiled steel sheet protection, and proved to be the most effective solution where a rapid turnaround was required to ensure the facility was quickly up and running.

This project was undertaken for CBRE Birmingham by main contractor ISS Ltd. and work to the roof was completed well within budget and the stipulated 22 weeks by DriSilane® Roofing Programme experts D. Evans Ltd. of Leeds.

### Specification:

Roof: DriSilane® ReCote

### Area

28,620 m<sup>2</sup>

- o cut edge repair & sheet repaint

### Project Installation:

D. Evans Ltd

Tel: 0113 278 9603

## DriSilane® Roofing Programme

The best specification, product and applicator combination for the refurbishment of profiled steel sheets, seals and gutters.

DriSilane® specifications use advanced hybrid technology that combines the elasticity of silicone and toughness of polyurethane for durable flexibility, adhesion and strength.

DriSilane® products are manufactured and tested to robust and accredited ISO quality and environmental standards by the largest independent producers of sealants in the UK.

Fully moisture tolerant, DriSilane® coatings are installed only by experienced professionals, industry recognised for their skill and expertise.

DriSilane® ReCote carries a 20 year warranty.
