**AUCTION CENTRE
LEYBURN**

Successful Bid for ReCover

Bringing the hammer down on older steel roofing sheets and components needs a specialist designed specification to combat aged coatings, cut edge corrosion and tired seals.

So when faced with these issues during the refurbishment of the roof of a long established and prestigious auction house at Leyburn, project managing team Ryden of Leeds, turned to DriSilane® to supply the most effective solution.

DriSilane® specifications are designed to refurbish profiled steel roofs by reinstating sheet protection, seals and gutters with advanced coating technology, installed by experienced professionals, recognised for their skill and expertise.

Work to the roof of this project was completed without disruption to auction proceedings, within budget and on time by DriSilane® coatings experts D. Evans Ltd of Leeds.

Roof Item: Aged Factory Coating /	Area	Specification
Cut Edge Corrosion / Water Ingress	1,700 m ²	DriSilane® ReCover
