

B&Q

CARDIFF GATE RETAIL PARK

100,000 sq ft.

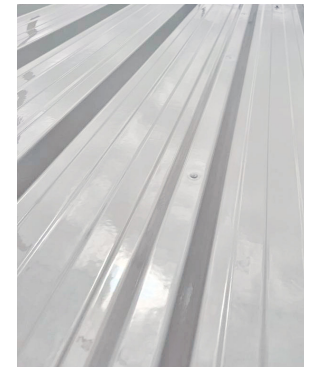

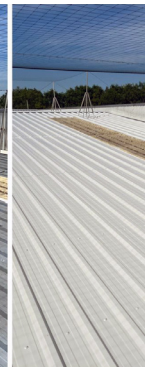

Elite Roof Management

As sheets age, their factory coated protection can diminish which if neglected can result in corrosion and costly roof replacement. Timely re-coating can preserve that protection for decades to come.

The busy 100,000 sq ft B&Q store in the Cardiff Gate retail outlet is a case in point.

Here, management had already secured the roof from the unwanted attention of birds and the next logical step was to follow the steel producers' durability guidance to future proof the roof sheets themselves to ensure the roof remained in the best possible condition,

By choosing the fully moisture tolerant DriSilane® ReCote specification, DriSilane® Programme experts Doncaster Maintenance Ltd were able to ensure the extensive repainting works were easily completed within budget and ahead of schedule with no disruption, closure or distraction to busy store trading, staff, or customers.

Specification:

Roof: **DriSilane® ReCote** 10,805 m²

- cut edge treatment & sheet repaint

DriSilane® Roofing Programme

The best specification, product and applicator combination for the refurbishment of profiled steel sheets, seals and gutters.

DriSilane specifications use advanced hybrid technology that combines the elasticity of silicone and toughness of polyurethane for durable flexibility, adhesion and strength.

DriSilane products are manufactured and tested to robust and accredited ISO quality and environmental standards by the largest independent producers of sealants in the UK.

Fully moisture tolerant, DriSilane coatings are installed only by experienced professionals, industry recognised for their skill and expertise.

DriSilane® ReCote carries a 20 year warranty.

The best combination of
Specification, Product & Applicator
... for the job!
